EAS Submit

EAS Submit is a hosted service for uploading and submitting an app binary to the app stores.

EAS Submit is a hosted service for uploading and submitting your app binaries to the app stores. Since it's a hosted service, you can submit your app to both stores as long as you can run EAS CLI on your machine. This means you can easily submit your iOS and Android apps from your macOS, Windows, or Linux workstation or from CI.

Get started

Configuration with eas.json

See how to configure your submissions with `eas.json`. →

Submit to the Google Play Store
