# Testing with Jest

## Mocking native modules

In order to load mocks provided by RNGH add following to your jest config in `package.json`:

```
"setupFiles": ["../node_modules/react-native-gesture-handler/jestSetup.js"]
```

Example:

```
"jest": {  
  "preset": "react-native",  
  "setupFiles": ["../node_modules/react-native-gesture-handler/jestSetup.js"]  
}
```

## Testing Gestures' and Gesture handlers' callbacks

RNGH provides an API for triggering selected handlers:

- `fireGestureHandler(gestureOrHandler, _eventList)`
- `getByGestureTestId(testID)`
