# Expo Battery

 GitHub

 npm

A library that provides battery information for the physical device, as well as corresponding event listeners.

provides battery information for the physical device (such as battery level

## On this page

- Installation
- Usage
- API
- Hooks
  - `useBatteryLevel()`
  - `useBatteryState()`
  - `useLowPowerMode()`
  - `usePowerState()`
- Methods
  - `getBatteryLevelAsync()`
  - `getBatteryStateAsync()`
  - `getPowerStateAsync()`
  - `isAvailableAsync()`
  - `isBatteryOptimizationEnable...`
  - `isLowPowerModeEnabledAsync()`
- Event Subscriptions
  - `addBatteryLevelListener()`
  - `addBatteryStateListener()`
  - `addLowPowerModeListener()`
- Types
  - `BatteryLevelEvent`
  - `BatteryStateEvent`
  - `PowerModeEvent`
  - `PowerState`
  - `Subscription`
- Enums
  - `BatteryState`
