

[API reference](#)[Actions](#)[DrawerActions](#)**Version: 6.x**

DrawerActions reference

`DrawerActions` is an object containing methods for generating actions specific to drawer-based navigators. Its methods expand upon the actions available in `CommonActions`.

The following actions are supported:

openDrawer

The `openDrawer` action can be used to open the drawer pane.

```
import { DrawerActions } from '@react-navigation/native';

navigation.dispatch(DrawerActions.openDrawer());
```

closeDrawer

The `closeDrawer` action can be used to close the drawer pane.

```
import { DrawerActions } from '@react-navigation/native';

navigation.dispatch(DrawerActions.closeDrawer());
```

toggleDrawer

The `toggleDrawer` action can be used to open the drawer pane if closed, or close if open.

```
import { DrawerActions } from '@react-navigation/native';
```

```
navigation.dispatch(DrawerActions.toggleDrawer());
```

jumpTo

The `jumpTo` action can be used to jump to an existing route in the drawer navigator.

- `name` - *string* - Name of the route to jump to.
- `params` - *object* - Screen params to pass to the destination route.

```
import { DrawerActions } from '@react-navigation/native';

const jumpToAction = DrawerActions.jumpTo('Profile', { name: 'Satya' });

navigation.dispatch(jumpToAction);
```
