    Do a storybook action
  </QuickLinks.Item>
  <QuickLinks.Item onPress={console.log} icon={Icons.Check}>
    Do a storybook action
  </QuickLinks.Item>
</QuickLinks>
```

Introduction

- Visually emphasizes a distinct group of links and navigate to other pages
- May be used in different areas of the content
- Responsive component that changes based on viewport
- Render as a list of links

- `XS` and `SM` viewports
 - Group expands 100% width
 - Item expands 100% width
 - Visually contained
- `MD`, `LG`, and `XL` viewports
 - Group expands 100% of content container width
 - Item has min-width of 144px, expands based on content similar to Button component
 - Item appears on the next row when it exceeds group width

#[Follow the appropriate instructions](#) to add this component in to your app.

Guidance

- If theme token `list` is true, it will render an ordered list based on List;
- If theme token `button` is true, and `list` as false, it renders a wrapping horizontal bar of buttons;
- If the theme returns `card` token as true, it wraps the above with a `Card`.
- Keep the text short and precise. It should fit on a single line (our recommendation is 2-24 characters for French and English)
- Use alternative components that best apply to your need and purpose:
 - Use [NavigationBar](#) to provide an additional way navigate to other pages within a specific category or product line; typically appears at the top of the page before all the content
 - Use `ButtonGroup` to select/filter options
 - Use `Tabs` to show/hide a selection of content

Accessibility

- Announce group of links
- Follow the natural tab order

Props

QuickLinks

Name	Type	Platform	Default	Description
tag	string	standard	'ul'	The HTML tag to render the list as
tokens	tokens	standard		System tokens prop, see tokens for more details
cardTokens	custom	standard		Custom tokens override for `Card`
listTokens	custom	standard		Custom tokens override for `QuickLinksList`
variant	variant	standard		System variant prop, see variants for more details
children	node	standard		

QuickLinks.Item

Name	Type	Platform	Default	Description
LinkRouter	elementType	standard		
linkRouterProps	object	standard		
tokens	tokens	standard		System tokens prop, see tokens

Name	Type	Platform	Default	Description
				for more details
variant	variant	standard		System variant prop, see variants for more details
children	node	standard		

Variants

This component does not have any stylistic variants.

Tokens

In exceptional circumstances, the following tokens can be passed to this component to override its default styles. **Do not do this unless absolutely necessary.** [Read more about overriding styles.](#)
