

**THE BASICS (WINDOWS)**

System Requirements

[Edit](#)

You can run React Native for Windows apps only on:

- All Windows 11 devices
- Windows 10 devices with Windows version: 10.0.16299.0 (aka 1709, aka Redstone 3, aka Fall Creators Update) or higher Some features may not work on all versions. See [Windows 10 Compatibility](#) for version support details.

To develop React-Native for Windows apps, you need to install several dependencies.

Install the development dependencies

To check or install dependencies, run the script `rnw-dependencies.ps1` in an elevated PowerShell window.

Run this command: Start an **elevated** PowerShell window and run:

```
Set-ExecutionPolicy Unrestricted -Scope Process -Force;  
iex (New-Object System.Net.WebClient).DownloadString('https://aka.ms/rnw-vs2022-deps.ps1');
```

Troubleshooting

React Native for Windows + macOS 0.72

[Docs](#)[APIs](#)[Blog](#)[Resources](#)[Samples](#)[Support](#)

- If you get a red error box in your UWP app window with the error message : `ERROR: Instance failed to start. A connection with the server cannot be established ,` make sure you have the packager running using `yarn start` and run the app again.
