</QuickLinksFeature>
```

Introduction

Visually emphasize a distinct group of links and navigate to other pages.

[Follow the appropriate instructions](#) to add this component in to your app.

Guidance

- Responsive component; displays differently in different breakpoints
- Render as a list of links
- Group expands 100% width
- Display item in the next row when it exceeds available group width
- Animate on hover, increase image by 10%

Accessibility

- Announce group of links
- follow the natural tab order
- Include ALT text for image

Platform considerations

The component is available on both native platforms and web.

Props
