

Version: 3.x

withSequence

`withSequence` is an animation modifier that lets you run animations in a sequence.

[Preview](#) Code

Reference

```
import { withSequence } from 'react-native-reanimated';

function App() {
  sv.value = withSequence(withTiming(50), withTiming(0));
  // ...
}
```

▼ Type definitions

Arguments

`reduceMotion` Optional

A parameter that determines how the animation responds to the device's reduced motion accessibility setting.

```
...animations
```

Any number of animation objects to be run in a sequence.

Returns

`withSequence` returns an animation object. It can be either assigned directly to a shared value or can be used as a value for a style object returned from useAnimatedStyle.
