

## TELUS Component Library

# WebVideo

## Web Component

## Introduction

Embed YouTube videos.

[Follow the appropriate instructions](#) to add this component in to your app.

## Guidance

When using a video from YouTube is necessary, you may do so by providing the ID of the video to the `videoId` prop. This will leverage the standard YouTube player. Like `Video`, `WebVideo` can be positioned and sized with `FlexGrid`. It is required that the time be passed in (in seconds) to the `videoLength` prop. Additionally, you may define the video's default volume and whether it should be muted from the start. If you happen to be using a YouTube video that is not in

16:9 aspect ratio, you may also set a 4:3 or 1:1 aspect ratio via the `aspectRatio` prop. If a thumbnail that is different from the one provided by YouTube is required, a custom one may be passed in to the `posterSrc` prop.

## Accessibility

See [Video](#) for more information.

## Platform considerations

This component is currently only supported on web.

## Props

Name	Type	Platform	Default	Description
<code>aspectRatio</code>	'16:9'   '4:3'   '1:1'	web only	'16:9'	The aspect ratio of the player.
<code>defaultVolume</code>	number	web only	1	The video's default volume, defined from 1 to 100. Please use the <code>`beginMuted`</code> prop to have the video start silenced.
<code>beginMuted</code>	bool	web only	false	Defines if the video should start muted.
<code>onStart</code>	func	web only	() => {}	A function to be run when the play button is pressed on the video splash screen and the

Name	Type	Platform	Default	Description
				video is ready to play.
videoid.*	string	web only		The video's ID, typically available via the video's URL.
posterSrc	string	web only		A path of the image that will be displayed on the video's splash screen. If this is undefined, it will pull an image from the defined web video if available.
videoLength.*	number	web only		The video's length, which will be displayed on the splash screen. This is defined in seconds.
copy	'en'   'fr'	web only		The splash screen UI's language as an ISO language code. It currently supports English and French.

## Variants

This component does not have any stylistic variants.
