/>
```

Introduction

```
import { VideoPicker } from '@telus-uds/components-web'
```

Features

- Responsive component per breakpoint
- Video is 16:9 aspect ratio
- Thumbnails are 16:9 aspect ratio
- Available in a frame variant in breakpoints LG and larger

[Follow the appropriate instructions](#) to add this component in to your app.

Guidance

Use `VideoPicker` to display a group of videos and play the selected video in the main area.

CAUTION

Note that YouTube videos without thumbnails will appear as white ellipsis on grey background. To avoid this, choose videos that have valid thumbnails on YouTube, and upload any missing thumbnails where possible.

Accessibility

The video thumbnails are announced as radio group items. They can be focused and interacted with using the keyboard.

Platform considerations

This component is currently only supported on web.

Props

Name	Type	Platform	Default	Description
videoList	arrayOf	web only	[]	An array of Video objects.
selectedVideo	string	web only	videoList[0]?.videoid	Id of the currently selected video (defaults the first video if not set).
