

TELUS Component Library

Toast

Web Component | [Figma UI KIT](#)

```
<Toast toast copy="Shoping Smartphones?" />
```

Introduction

```
import { Toast } from '@telus-uds/components-web'
```

Use Toast to display important content and focus attention.

[Follow the appropriate instructions](#) to add this component in to your app.

Guidance

- Select the size that best fits your context
 - Default (medium text)
 - Small (small, compact text)
- Use `textAlign` to set alignment explicitly
 - By default, text is left-aligned
 - When `roundedCorners` is set, text is center-aligned
- Use `roundedCorners` when showing Callout within content bounds
 - Don't use `roundedCorners` when showing Callout full-width, edge-to-edge
- Use `icon` to show Icon

Accessibility

If your toast is dynamically triggered, ensure that the content is appropriately marked up such that it will be announced by assistive technologies. For example use an `aria-live` region.

toggle toast

```
function() {  
  const [visible, setVisible] = useState(false)  
  return (  
    <StackView space={3}>  
      <div aria-live={true}>  
        {visible && <Toast toast copy="Shopping Smartphones?"  
/>}  
      </div>  
      <Button onPress={() => setVisible(!visible)}>toggle  
toast</Button>  
    </StackView>  
  )  
}
```

Platform considerations

This component is currently only supported on web.

Props

Name	Type	Platform	Default	Description
variant	variant	web only	{}	System variant prop, see variants for more details
tokens	tokens	web only		System tokens prop, see tokens for more details
toast	bool	web only		If true, the toast will be displayed
copy*.	string	web only		The copy to display in the toast

Name	Type	Platform	Default	Description
headline	string	web only		The headline to display in the toast (before copy)
link	shape	web only		The link to display in the toast (after copy)

Tokens

In exceptional circumstances, the following tokens can be passed to this component to override its default styles. **Do not do this unless absolutely necessary.** [Read more about overriding styles.](#)

► View Tokens

Variants

Headline

```
<Toast toast copy="Shopping Smartphones?" headline="Latest offers" />
```

Link

```
<Toast toast copy="Shopping Smartphones?" link={{ href: '#', text: 'Get the latest deals' }} />
```

Headline and Link

```
<Toast
  toast
  copy="Shopping Smartphones?"
  headline="Latest offers"
  link={{ href: '#', text: 'Get the latest deals' }}
/>
```
