Add custom native code

Learn how to add custom native code to your Expo project.

The Expo Go app is a great tool to get started — it exists to help developers quickly get projects off the ground,

On this page

Adding custom native code with development builds

Generate native projects with prebuild

Manually changing the native project files

Reverting changes from `npx expo run:[android|ios]`

Developing apps with custom native code

Releasing apps with custom native code to production

Creating native modules
