Drawer

Learn how to use the Drawer layout in Expo Router.

To use [drawer navigator](#) you'll need to install some extra dependencies.

 Terminal Copy

```
- npx expo install @react-navigation/drawer
```

Next, you'll need to update your **babel.config.js** to include the reanimated plugin:

 babel.config.js Copy

```
module.exports = {
  presets: [
    ...
  ],
  plugins: [
    ...
    'react-native-reanimated/plugin',
  ],
};
```

 After changing your `babel.config.js`, once run `npx expo start --clear` to start the development server and clear the babel cache. Now you can use the `Drawer` layout to create a drawer navigator:
