React Native's Animated library reimplemented

Reanimated 3 is here! Check out our [documentation page](#) for more information

React Native Reanimated provides a more comprehensive, low level abstraction for the Animated library API to be built on top of and hence allow for much greater flexibility especially when it comes to gesture based interactions.

## Nightly CI state

A dashboard showing the status of various nightly CI jobs. Each job is represented by a button with a GitHub Actions icon, the job name, and a status label (passing in green, failing in red).

Job Name	Status
Build nightly npm package	passing
Run nightly monorepo test	passing
Check static framework nightly build	passing
Check React Native nightly build	failing
Check Expo dev-client nightly build	passing
Check TypeScript with different React Native versions	passing
Test V8 on Android nightly	passing
Test build on Windows nightly	passing

## Installation

Check out the [installation](#) section of our docs for the detailed installation instructions.

## Fabric

To learn how to use `react-native-reanimated` with Fabric architecture, head over to [Fabric README](#). Instructions on how to run Fabric Example within this repo can be found in the [FabricExample README](#).

## Documentation

Check out our dedicated documentation page for info about this library, API reference and more: <https://docs.swmansion.com/react-native-reanimated/>

## Examples

The source code for the example (showcase) app is under the [Example/](#) directory. If you want to play with the API but don't feel like trying it on a real app, you can run the example project. Check [Example/](#) directory README for installation instructions.

## License

Reanimated library is licensed under [The MIT License](#).

## Credits

This project has been built and is maintained thanks to the support from [Shopify](#), [Expo.io](#) and [Software Mansion](#)
