⚠ **EAS**

Introduction

📦 **EAS Build**

Introduction

Create your first build

Configure with eas.json

Internal distribution

Automate submissions

Use EAS Update

Trigger builds from CI

Trigger builds from GitHub App

⌄ App Signing

App credentials

Use automatically managed credentials

Use local credentials

# Use local credentia

Learn how to configure and use local credentials when using EAS.

You can usually get away with not being a code signing expert by letting EAS handle it for you. However, there are cases where

📄 **On this page**

credentials.json

  Android credentials

  iOS Credentials

Setting a credentials source

Using local credentials on builds triggered from CI
