⚠️ **EAS**

Introduction

📦 **EAS Build**

Introduction

Create your first build

Configure with eas.json

Internal distribution

Automate submissions

Use EAS Update

Trigger builds from CI

Trigger builds from GitHub App

⌄ App Signing

App credentials

Use automatically managed credentials

Use local credentials

App credentia

Learn about what app credentials Android and iOS require.

Expo automates the process of signing your app for Android and iOS, but in both cases, you can choose to provide your overrides.

EAS Build

On this page

Android

  App signing by Google Play

  Download Credentials

  Export keystore to pem format

  Contact Google support

iOS

  Distribution Certificate

  Push Notification Keys

  Provisioning Profiles

  Summary

  Clearing Credentials

  Re-signing new credentials
