Experience Fluent 2

Persona Cross-platform

Personas are used for rendering an individual's avatar and presence. PersonaCoin renders the circular image component, and Persona renders a PersonaCoin along with descriptive text components.

Usage Guidelines

Persona in various sizes

Example usage (from [PersonaCoinTest.tsx](#))

```
import * as React from 'react';
import { PersonaCoin, Persona } from '@fluentui/react-native';
import { View } from 'react-native';

const satyaPhotoUrl = 'https://www.microsoft.com/en-us/CMSImages/satya.jpg?version=0881eb71-4942-b627-d602-
84c832b8a0b6&amp;CollectionId=1b46ce2d-c90d-421e-94f1-cfb6bc6ef6ec';

const App = () => {
  return (
    <View>
      <PersonaCoin
        size='size24'
        initials="SN"
        imageDescription="Photo of Satya Nadella"
        presence='online'
        imageUrl={satyaPhotoUrl}
        coinColor='blue'
      />
```

Implementation

IPersonaProps interface

Extends `IPersonaCoinProps, IPersonaState,`

Name	Type	Default value	Description
`optionalText`	string		Optional text to display, usually a custom message set. The optional text will only be shown when using size100.
`secondaryText`	string		Secondary text to display, usually the role of the user.
`tertiaryText`	string		Tertiary text to display, usually the status of the user. The tertiary text will only be shown when using size72 or size100.
`text`	string		Primary text to display, usually the name of the person.
