Use Firebase

Use Flipper

Use Google authentication

Use ESLint

Use Next.js

Use Sentry

Use TypeScript

⟩ Expo accounts

⌄ Bare React Native

Overview

Install Expo modules

Migrate to Expo CLI

Add expo-updates to an existing project

Custom native code in Expo Go

Install development builds in bare React Native

Error recovery

Regulatory compliance

Data and Privacy protection

GDPR compliance

Migrate to Expo CLI

Learn how to migrate to use Expo CLI instead of @react-native-community/cli in any React Native project.

To migrate from

```
npx
react-
native
init
```

to Expo CLI, you'll need to install the

```
expo
```

🗒 **On this page**

Install the expo package

Why Expo CLI instead of npx react-native

Compile and run your app

Start the bundler independently
