🏠   API reference   Gesture Handlers   createNativeWrapper()

Version: 2.6.0 – 2.12.0

createNativeWrapper

> 🔥 **DANGER**
>
> Consider using the new gestures API instead. The old API is not actively supported and is not receiving the new features. Check out RNGH 2.0 section in Introduction for more information.

Creates provided component with NativeViewGestureHandler, allowing it to be part of RNGH's gesture system.

Arguments

Component

The component we want to wrap.

config

Config is an object with properties that can be used on `NativeViewGestureHandler`

Returns

Wrapped component.
