EAS Build Limitation

Learn about the current limitations of EAS Build.

📄 **On this page**

Fixed memory and CPU limits on build worker servers

Limited dependency caching

Maximum build duration of 2 hours

Yarn Workspaces is recommended for monorepos; official guidance for others is limited

Managed workflow projects on SDK 40 and below are not supported

Get notified about changes

EAS Build is designed to work for any React Native project. However, it is good to be aware of certain limitations that we plan to address since they could
