⌄ Bare React Native

Overview

Install Expo modules

Migrate to Expo CLI

Add expo-updates to an existing project

Custom native code in Expo Go

Install development builds in bare React Native

Error recovery

Regulatory compliance

Data and Privacy protection

GDPR compliance

HIPAA compliance and Expo

Are apps built with Expo HIPAA compliant?

They can be! You can build HIPAA compliant apps with Expo if you follow the requirements.

Expo doesn't collect any individually identifiable health data, and you can see all the data that Expo collects on our privacy explained page. That being said, you are ultimately in control of the data you collect from your users, so we cannot guarantee that all apps built with Expo are HIPAA compliant, as in the end, it is up to you as an individual application developer. But there should be no compliance issues with using Expo.
